REASONS FOR ALLOWANCE

1. The amendment filed 11/02/2004 has been entered. Claims 1-22 are pending in this Office action.

Allowable Subject Matter

2. Claims 1-22 are allowed.

3. The following is an examiner's statement of reasons for allowance: Tate et al fail to disclose a method of upstream power back-off in a broadband communication system comprising: a network terminate interface enabling determination of an upstream transmit power spectral density prior to upstream data transmission using the transmit GDR PSD; and management interface enabling operator configuration of the GDR PSD as recited in claims 1 and 12; and at least two transmission loops of differing lengths, the method comprising: the network termination type interface further enabling determination of an upstream transmit power spectral density defined as:

$$S(f) = \frac{L_r S_{GDR}(f)}{L_i |H(f)|^2},$$

where L_i is a determined length of a transmission loop associated with the network termination type interface, $H(f)^2$ is an estimated insertion loss of the associated transmission loop, and $S_{GDR}(f)$ represents the GDR PSD defined as:

$$S_{GDR}(f) = \frac{\eta(f)}{L_r \cdot K_{FEXT} \cdot f^2}$$

where $\eta(f)$ is an assumed reference noise profile, L_r is a nominal loop length, and K_{FEXT} is a constant representing the coupling from a first loop to an adjacent loop in communication system.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
